# APEX *i* DROP *a*

WITH MRX ACCEPTOR

## Key Features:

- **Fast Processing Speed:** 2 notes per second for rapid cash handling.
- **Bulk Note Processing:** 30 notes at once, enabling fast transactions.
- **Multi-Note Escrow:** holding up to 30 notes in escrow, enabling the same notes to be returned if the transaction is canceled.
- **Flexible Banknote Insertion:** 4 ways in total, reducing user errors.
- **Barcode Ticket Compatibility:** reading tickets in 2 ways for quick validation.
- **Large Cash Box Capacity:** 2200 notes in total.
- **User Interface & Display:** 11.6-inch main display. Optionally providing a 10.1-inch external rotating display.
- **Ticket Printer:** integrated into the system.
- **PTM Area for Customer Card Readers:** for seamless card-based transactions.
- **SAS System Integration:** for your existing SAS accounting system.
- **Ticket-to-Table Capability:** TITO ticket validation for immediate validation and exchange at the table.
- **Partial Ticket Exchange:** offering flexibility to the players.
- **SAS System Integration:** for your existing SAS accounting system, allowing it to be connected to any slot accounting system. The casino can create a group of iDrops and therefore see the real-time drops online.

# APEX *i* DROPS

**BILL ACCEPTOR FOR THE GAMING TABLE**

The brand new iDROPS adds a great new service for drop management at gaming tables. It combines security, high-speed and flexibility. Notes and tickets can be entered in a bulk of up to 250 at a time. The iDROPS does the rest automatically – securely validating and storing each individual note or ticket. Speed is the essence – see for yourself how quickly the iDROPS functions. An integrated ticket printer as well as player card reader are built inside the iDROPS. Furthermore, players can now bring tickets to the tables in exchange for jetons. The iDROPS even allows players to choose the amount to have in jetons – the remaining is paid out by ticket.

Improved mechanics of the proven device dispose of an optional scanner that allows card recognition and sorting feature, so the device enables sparing even more time of your staff, increases effectivity and safety of your business operation.

## COMFORT AND SAFETY

System of two card decks allows you to use one deck in play while the other deck is simultaneously shuffled to be ready for the next deal. The shuffle is controlled by a GLI approved random number generator. Game deceleration caused by hand shuffling is eliminated, thereby your rake is significantly increased. Dealer has more time to pay attention to the game. Cards are always shuffled properly. The Shuffle King 2 MAX provides much better gaming comfort, safety and the fastest operation within our product range.

## Electronic card shuffler

### TECHNICAL SPECIFICATION

The shuffler operates with a preset deck size to shuffle, adjustable in the range from 2 to 54 cards. The device accepts 100% plastic cards (recommended), semi-plastic and paper cards. The maximum card size is 88 x 63 mm. It is also possible to use narrow cards with dimensions of 88 x 57 mm. Excessive cards in the deck will stay unshuffled in the insertion compartment. Card width can be easily adjusted in the user menu. Each card is counted; the total number is shown on display. The Shuffle King 2 MAX supports an optional Card Recognition feature which allows the shuffler to detect wrong or specific missing cards. Together with card recognition, the shuffler also supports a Sorting feature.
