APEX *i* DROPS

BILL ACCEPTOR FOR THE GAMING TABLE

The brand new iDROPs adds a great new service for drop management at gaming tables. It combines security, high-speed and flexibility. Notes and tickets can be entered in a bulk of up to 250 at a time. The iDROPs does the rest automatically – securely validating and storing each individual note or ticket. Speed is the essence – see for yourself how quickly the iDROPs functions. An integrated ticket printer as well as player card reader are built inside the iDROPs. Furthermore, players can now bring tickets to the tables in exchange for jetons. The iDROPs even allows players to choose the amount to have in jetons – the remainder is paid out by ticket.
